Section I. Accelerator and microprobe technology

Dedicated accelerator and microprobe line
K.G. Malmqvist, G. Hyltén, M. Hult, K. Håkansson, J.M. Knox, N.P.-O. Larsson, C. Nilsson, J. Pallon, R. Schofield, E. Swietlicki, U.A.S. Tapper and C. Yang 3

Heavy ion microprobes and their applications
M. Takai, Y. Horino, Y. Mokuno, A. Chayahara, M. Kiuchi, K. Fujii and M. Satou 8

High-brightness proton beams at the NAC nuclear microprobe by acceleration of H_2 ions
U.A.S. Tapper, W.R. McMurray, G.F. Ackermann, C. Churms, G. De Villiers, D. Fourie, P.J. Groenewald, J. Kritzinger, C.A. Pineda, J. Pilcher, H. Schmitt, K. Springhorn and T. Swart ... 17

Design of a compact nuclear microprobe system with a liquid metal ion source
M. Takai, R. Mimura, H. Sawaragi and R. Aihara 25

The effect of lens arrangement in a triplet and in a Russian quadruplet on the demagnification and beam current in a microprobe
V. Brazhnik, A. Dymnikov, R. Hellborg, S. Lebed, J. Pallon and V. Storizhko 29

Design modifications to reduce duodecapole components in the fringe field region of magnetic quadrupole lenses
G.R. Moloney, D.N. Jamieson and G.J.F. Legge 35

Section II. Microprobe systems

The upgraded Amsterdam nuclear microprobe
R.D. Vis, J.L.A.M. Kramer, G.H.J. Tros, F. van Langevelde and L. Mars 41

The LLNL Multi-user Tandem Laboratory PIXE microprobe
D.W. Heikkinen, G.S. Bench, A.J. Antolak, D.H. Morse and A.E. Pontau 45

The Zagreb nuclear microprobe facility
M. Jakšić, L. Kukec and V. Valković 49

A versatile system for the rapid collection, handling and graphics analysis of multidimensional data
P.M. O'Brien, G. Moloney, A. O'Connor and G.J.F. Legge 52

A VAX and PC-based data acquisition system for MCA, scanning and list-mode analysis
C.L. Churms, J.V. Pilcher, K.A. Springhorn and U.A.S. Tapper 56

A UNIX-based real-time data acquisition system for microprobe analysis using an advanced X11 window toolkit
J.L.A.M. Kramer, A.H. Ullings and R.D. Vis 62

The AGLAE scanning nuclear microprobe setup
N.E.G. Lövestam, T. Calligaro, A. Duval and J. Salomon 66

Currently used control and data acquisition systems for nuclear microprobes
N.E.G. Lövestam 71

0168-583X/93/$06.00 © 1993 – Elsevier Science Publishers B.V. All rights reserved

Innovative features of the Schonland proton microprobe
J.I.W. Watterson, R.W. Fearick, S.H. Connell, H.J. Annegarn, W.J. Przybylowicz, A.H. Andeweg, I. McQueen and J.P.F. Sellschop 79

High resolution, position sensitive detector for energetic particle beams
E.P. Marsh, M.D. Strathman, D.A. Reed, D.H. Morse, A.E. Pontau and R.W. Odom 85

Section III. Analytical methodology

Quantitative PIXE microanalysis of thick specimens
J.L. Campbell, D. Higuchi, J.A. Maxwell and W.J. Teesdale 95

Measurement of (p, p) elastic cross sections for C, O and Si in the energy range 1.0–3.5 MeV
R. Amirikas, D.N. Jamieson and S.P. Dooley 110

Large-depth profiling of hydrogen by line scans of the nuclear microbeam over slope planes cut with an ion beam
D. Grambole, F. Herrmann and W. Hauffe 117

Light-element analysis with the CENBG nuclear microprobe
Y. Llabador, Ph. Moretto and H. Guegan 123

Application of MeV heavy ion microprobes for PIXE measurements
Y. Mokuno, Y. Horino, A. Chayahara, M. Kiuchi, K. Fujii, M. Satou and M. Takai 128

Computer simulation of PIXE and μ-PIXE spectra for inhomogeneous thick target analysis
K.K. Loh, C.H. Sow, I. Orlic and S.M. Tang 132

Determination of X-ray takeoff angle from the L/K X-ray intensity ratio for PIXE analysis of a nonflat target
K. Maeda, Y. Sasa, M. Takami and M. Uda 137

Micro-RBS analysis using a toroidal electrostatic analyzer
A. Kinomura, H. Andoh and M. Takai 140

Comparison of proton and electron microbeam studies of mineral inclusions in diamond
J.P.F. Sellschop, S.H. Connell, W.J. Przybylowicz, H.O.A. Meyer, R.J. Hart and J. Milledge .. 144

Section IV. Imaging

High resolution imaging with high energy ion beams
G.J.F. Legge, J.S. Laird, L.M. Mason, A. Saint, M. Cholewa and D.N. Jamieson 153

MeV ion beam lithography of PMMA
M.B.H. Breese, G.W. Grime, F. Watt and D. Williams 169

Applications of energy loss contrast STIM
G. Bench, A. Saint, G.J.F. Legge and M. Cholewa 175

Channeling STIM and its applications
M. Cholewa, A. Saint, G.J.F. Legge, D.N. Jamieson and T. Nishijima 184

Imaging with ionoluminescence (IL) in a nuclear microprobe
C. Yang, N.P.-O. Larsson, E. Swietlicki, K.G. Malmqvist, D.N. Jamieson and C.G. Ryan 188

Multivariate statistical processing of elemental maps from nuclear microprobes
E. Swietlicki, N.P.-O. Larsson and C. Yang 195

Dynamic analysis: on-line quantitative PIXE microanalysis and its use in overlap-resolved elemental mapping
C.G. Ryan and D.N. Jamieson 203

Section V. Microtomography and single event studies

Analysis of unsectioned specimens: 2D and tomographic PIXE with STIM
R.M.S. Schofield and H.W. Lefevre 217

Ion microtomography using ion time-of-flight
M.L. Roberts, D.W. Heikkinen, I.D. Proctor, A.E. Pontau, G.T. Olona, T.E. Felter, D.H. Morse and B.V. Hess 225

Data processing for RBS tomography analysis
M. Takai, Y. Katayama and A. Kinomura 229

Investigation of isolated chemical vapour deposited diamonds using STIM tomography
S.-A. Stuart, M. Cholewa, A. Saint, S. Prawer, G.J.F. Legge and D. Weirup 234

Evaluation of single-event immunity in micron-size device area using single-ion microprobe technique
T. Matsukawa, K. Noritake, M. Koh, K.-I. Hara, M. Goto and I. Ohdomari 239

Study of nuclear microprobe beam halo using IBIC
M.B.H. Breese, G.W. Grime and F. Watt 243

Section VI. Biomedical applications

Nuclear microscopy: biomedical applications
F. Watt and J.P. Landsberg 249

Nuclear microscopy in trace-element biology – from cellular studies to the clinic
U. Lindh 261

The preparation of biological tissue for a trace element analysis on the proton microprobe
B.J. Kirby and G.J.F. Legge 268

Quantitative mapping of intracellular cations in the human amniotic membrane
Ph. Moretto, Y. Llabador, M. Simonoff, L. Razafindrabe, M. Bara and A. Guiet-Bara 275

The use of a scanning proton microprobe in AIDS research
M. Cholewa, G.J.F. Legge, H. Weigold, G. Holan and C. Birch 282

Applications in medicine using the new Lund microprobe
J. Pallon, J. Knox, B. Forslind, Y. Werner-Linde and T. Pinheiro 287

Application of a heavy ion microprobe for the study of human nails
Y. Horino, Y. Mokuno, K. Fujii and M. Takai 294

Section VII. Materials and semiconductor applications

The generation and applications of ion beam induced charge images
M.B.H. Breese, G.W. Grime and F. Watt 301

Three-dimensional nuclear microanalysis in materials science
G. Demortier and S. Mathot 312

Dislocation imaging with a scanning proton microprobe using channeling scanning transmission ion microscopy (CSTIM)
P.J.C. King, M.B.H. Breese, G.R. Booker, J. Whitehurst, P.R. Wilshaw, G.W. Grime, F. Watt and M.J. Goringe 320

The effect of ion induced damage on IBIC images
M.B.H. Breese, G.W. Grime and M. Dellith 332

Electron and ion beam induced current in MOS IC analysis
V.F. Gancheva, U.A.S. Tapper and C.L. Churms 339

Soft error immunity in a DRAM investigated by nuclear microprobes
M. Takai, H. Sayama, H. Kimura, Y. Ohno and S. Satoh 344

Scanning micro-analysis of SiC–Si_3N_4 material by proton non-Rutherford elastic backscattering
W. Wang, J. Zhu, A. Le, R. Lu, S. Lin, J. Bao, D. Jiang, J. She and A. Ji 349

Ion beam induced charge collection (IBICC) microscopy of ICs: relation to single event upsets (SEU)
K.M. Horn, B.L. Doyle, F.W. Sexton, J.S. Laird, A. Saint, M. Cholewa and G.J.F. Legge 355

Microanalysis of MOCVD treated porous silicon
M.C. Briggs, L.G. Earwaker, M.I. Nasir, J.P.G. Farr, J.M. Keen, D.G. Anderson, N. Anwar and B.J. Aylett 362

Observation of buried oxide layers in silicon by microprobe RBS
A. Kinomura, T. Lohner, Y. Katayama, M. Takai, H. Ryssel, R. Schork, A. Chayahara, Y. Horino, K. Fujii and M. Satou 369

In-situ multi-dimensional observation of masklessly implanted sites using MeV heavy ion microprobes
Y. Mokuno, Y. Horino, A. Chayahara, M. Kiuchi, K. Fujii, M. Satou and M. Takai 373

Section VIII. Geological and mineralogical applications

The nuclear microprobe as a tool in geology and mineral exploration
C.G. Ryan and W.L. Griffin 381

High-energy proton beam analysis of geological materials
N.M. Halden 399

Two-dimensional mapping of element variation in minerals using the Guelph proton microprobe
W.J. Teesdale, J.L. Campbell and N.M. Halden 405

Processing microPIXE linescan data – studies of arsenic zoning in skarn garnets
G.W. Grime, F. Watt, R.A. Wogelius and B. Jamtveit 410

Microprobe channeling analysis of pyrite crystals
D.N. Jamieson and C.G. Ryan 415

The activities with the Shanghai nuclear microprobe
J. Zhu, R. Lu, A. Le, Y. Gu, C. Yang, W. Wang, M. Li and Y. Mao 422

The use of nuclear microprobe techniques to study the chemistry of lacustrine sediments and particles
G.W. Grime and W. Davison 430

Stability and distribution of lithium and boron in minerals
N. Toulhoat, P. Courel, P. Trocellier and J. Gosset 436

Micro-PIXE analysis of platinum group minerals from placer deposits
A.J. Criddle, H. Tamana, J. Spratt, K.J. Reeson, D. Vaughan and G. Grime 444

Nuclear microprobe analysis of ^{14}N and its application to the study of ammonium-bearing minerals
M. Mosbah, A. Bastoul, M. Cuney and J. Pironon 450

Regrowth zones in laser annealed, radiation damaged diamond
D.N. Jamieson, S. Prawer, S.P. Dooley and R. Kalish 457

PIXE microanalysis of fluid inclusions and its application to study ore metal segregation between magmatic brine and vapor
C.G. Ryan, C.A. Heinrich and T.P. Mernagh 463

Determination of carbon and oxygen in fluid inclusions of rocksalt
N. Toulhoat, P. Trocellier, N. Akram and J. Gosset 472

Micron scale analysis of deep-sea ferromanganese nodules with nuclear microprobes
J. Zhu, Y. Wang and G.J.F. Legge 478

He^+ and H^+ microbeam damage, swelling and annealing in diamond
S.P. Dooley, D.N. Jamieson and S. Prawer 484

Characterization of organic matter in oil related rocks: experimental approach and illustration
F. Mercier, N. Toulhoat, P. Trocellier, C. Durand and M. Bisiaux 492

Section IX. Archaeological and other applications

Strontium and fluorine markings in shells of a mollusc (Paphies subtriangulata) with potential importance in biology and archaeology
G.E. Coote and W.J. Trompetter 501

Quantitative PIXE analysis of single fly ash particles by a proton microbeam
M. Jakšić, I. Bogdanović, E. Cereda, S. Fazinić and V. Valković 505

Earthworm transport of heavy metals from sewage sludge: a micro-PIXE application in soil science
R. Protz, W.J. Teesdale, J.A. Maxwell, J.L. Campbell and C. Duke 509

Two-dimensional impurity distributions in "water trees" occurring in field aged HV cables
P.F. Hinrichsen, A.J. Houdayer, G. Kajrys and J.-L. Parpal 517

Application of proton microprobe analysis to the study of electrostatic precipitation of single fly ash particles
A. Caridi, E. Cereda, G.W. Grime, M. Jakšić, G.M. Braga Marcazzan, V. Valković and F. Watt 524

Usewear studies of flint tools with microPIXE and microRBS
M. Christensen, G. Grime, M. Menu and P. Walter 530

Examining the diagenetic alteration of human bone material from a range of archaeological burial sites using nuclear microscopy
T.A. Elliott and G.W. Grime 537

Author index 549
